

Going up in the world: L100 TopLine from Hailo

There's a name for ladder expertise: Hailo. The inventor of the first aluminium household ladder impresses with an innovative product range offering just the right solution for every requirement and every application. The new L100 TopLine is a shining example of this. Whether in the house, the garage, or the building site, with a load capacity of up to 150 kg the aluminium safety household ladder provides secure and comfortable access when working at any height. Consumers can rely on the fact that Hailo is the number 1 when it comes to buying ladders*. And the L100 TopLine combines safety, user-friendliness, good design and top quality "Made in Germany". This lofty claim is underpinned by a 25-year guarantee.

Painting, wallpapering, redecorating and cleaning – there are a million uses for a household ladder every day. Safety is the number 1 priority here: the L100 TopLine has black XXL steps with non-slip ribbing and an extra-deep 13 cm support surface to provide stability when doing all kinds of jobs. The extendable safety rail can be pulled out easily with one hand to provide additional grip.

Items such as nails, paintbrushes, adhesive tape, tins of paint and sponges can simply be placed in the multipurpose tray, which also has two slots, two universal hooks, a bucket strap and a clip for securing larger tools such as hammers, screwdrivers and window cleaning equipment. Additional features include parallel stiles for more legroom and high-tech riveted stile-step joins.

This versatile all-rounder is equipped as standard with Hailo EasyClix basic feet, which can be replaced as and when required. Available as an accessory, the EasyClix Living Replaceable Foot Set protects delicate floor coverings from scratches and is

completely non-slip. The EasyClix Garden disc-shaped feet are ideal for soft ground, which means suitable feet are available, whatever the surface.

With these first-class qualities and maximum added value, the TopLine 100 is part of the "Best" product range at Hailo, symbolised by the colour gold on the packaging. Models with three to eight steps can be supplied; the maximum working height is approx. 3.72 metres.
