Technical modifications reserved.

## 1. Introduction

These use and operating instructions describe how to safely use the Hailo Klettermax step stool.

For your own safety, please read these instructions for use carefully before using the step stool and keep them handy for future reference.

If you should give this step stool to another person, please also provide him or her with these use and operating instructions.

## 2. Intended use

This step stool is a home accessory and a mobile aid for working which can be used for both climbing and sitting.

### Using the step stool as steps:

A 3-step stool is created when you extend the steps.

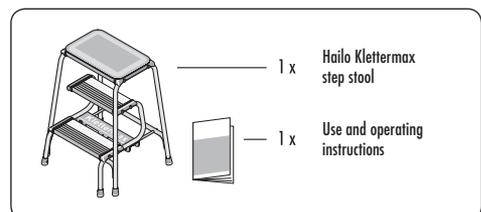

This design feature allows the step stool to be used for quick jobs when you need more height.

### Using the step stool as a stool:

A cushion – which folds over onto the top step – provides a pleasant and comfortable seat.

The dual-purpose design of the step stool makes it versatile and suitable for use in different locations.

## 3. Scope of delivery

## 4. User instructions

### Hailo Klettermax step stool 4353-101

- [A] Support surface/seat surface
- [B] Sliding part with 2 extending and retracting steps
- [C] Foot
- [D] Cushion (folds over)
- [E] Step stool markings

#### A) Using the step stool as steps:

First ensure that the step stool is suitable for the purpose for which it is to be used.

It must only be used in the position shown here.

Only use the steps provided for standing on.

Always consider the potential risks when using the step stool. There is a risk of falling from the step stool or of the step stool tipping over, which may result in personal injury and damage to property.

There is also a danger of injuries from potential squeeze or shear points when handling the step stool.

All work carried out with/on the step stool is to be undertaken in a manner that minimises risks.

The step stool is only to be used for light work of short duration. Do not spend long periods of time on the step stool without taking regular breaks (fatigue endangers safe use).

The step stool or parts thereof may not be altered.

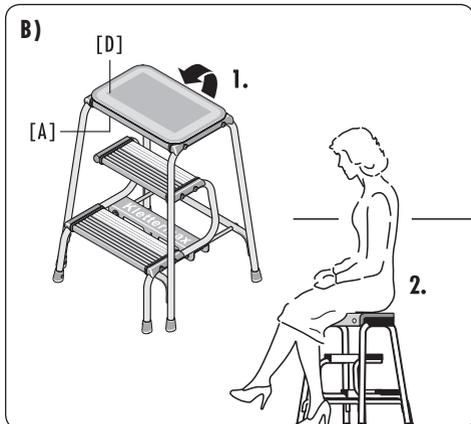

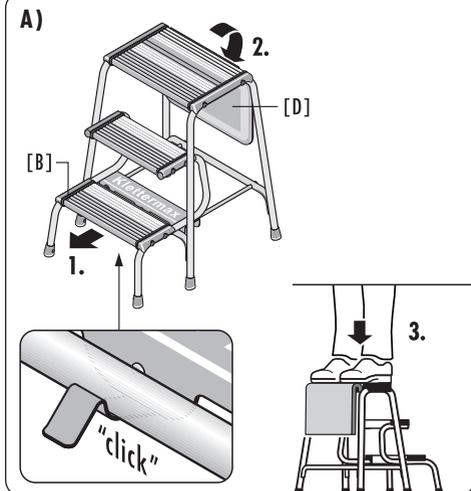

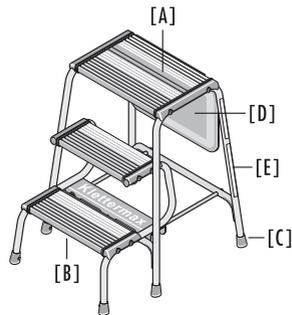

Make sure you have a secure grip while working as well as during ascent and descent!

Do not move the step stool while it is in use.

1. Extend the sliding part [B] – you will hear it “click” into position.
2. Fold over the cushion [D] as shown.
3. The step stool is now ready to be used as steps.

#### B) Using the step stool as a stool:

1. Fold over the cushion [D] to form the seat on the top step [A].
2. The step stool is now ready to be used as a stool.

## 5. Safety instructions

### 5.1 Instructions for using Hailo Klettermax Folding Steps

Do not set up the step stool on an uneven surface (rough terrain).

Do not use the step stool on stairs.

Avoid contaminating the surface of the ground to prevent any risk of slipping.

Do not lean out too far to the side. Avoid excessive lateral loads.

Do not use the step stool as a bridge.

Wherever possible, secure doors (but not emergency exits) and windows where you are working.

Children may not use the step stool. Take precautions to make sure that children do not play on the step stool.

### 5.2 Instructions for use as steps

Do not exceed the maximum permissible load of 150 kg.

To use the step stool for climbing, first extend the sliding part with the two lower steps.

When the cushion is in position on the top step, this step must not be used for standing on.

Only one person may stand on the step stool at a time.

Do not lean the step stool against a surface for climbing as you would a lean-to ladder. The feet of the step stool must all stand firmly on the ground.

### 5.3 Instructions for use as a stool

Do not exceed the maximum permissible load of 150 kg.

Only one person may sit on the stool at a time.

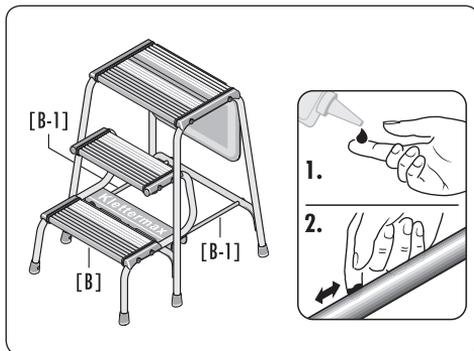

## 6. Cleaning / care

To ensure that the step stool continues to work properly, lightly lubricate both guide rails [B-1] for the sliding part [B] at regular intervals. (NB Care products are not included in the scope of the delivery.)

The cleaning of the step stool, in particular all of its moveable parts, should be undertaken immediately if it is visibly dirty.

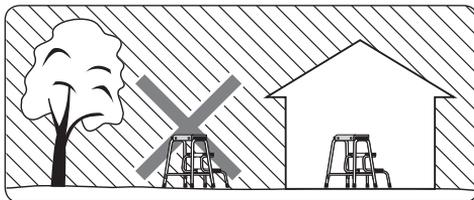

Only use commercially available, water-soluble detergent.

Do not use aggressive, abrasive agents.

## 7. Storage

The step stool must be stored where it will not be damaged and where it is protected from the weather.

## 8. Packaging / disposal

The packaging is to be disposed of in a manner that complies with applicable local regulations and laws.

After the step stool is no longer suitable for use it must be disposed of in accordance with the applicable regulations.

Aluminium is a high-grade material and should be recycled.

Detailed information on these matters may be obtained from your local municipality.

## 9. Service life

When used for intended purposes and with regular maintenance the step stool is a piece of work equipment and a home accessory that is suitable for long term use.

## 10. Service / replacement parts

For more information on services and replacement parts, contact the manufacturer.
