

Form and function in perfect balance

Harmony by Hailo

Waste bins as a chic accessory for the kitchen and home: the Harmony designer pedal waste bin will blend in beautifully with many modern interiors and is suitable for kitchens, open-plan living spaces and workplaces. With its characteristically curved lid, contoured styling and sleek elegance, Harmony is available in a striking stainless steel finish or corrosion-resistant coated sheet steel in white, silver, red, vanilla and black.

Balance made-to-measure! Harmony comes in two sizes to cater for individual everyday needs - the inner container in the Medium model holds 12 litres, the Large 20 litres. Both versions score highly in terms of functionality: a base ring with non-slip feet provides a secure footing for hygienic waste disposal when the ergonomically designed foot rail is lightly pressed. The lid will then open by as much as 90 degrees, making it easier to fill the bin - especially if both hands are full of rubbish. Nothing goes astray here: the practical rubber clamping ring can also be relied on to keep the bin liner in place and prevent it from slipping.

A special feature is the Soft Close cushioned closing mechanism, which works noiselessly. The pedal waste bin can simply be placed wherever required thanks to the carry handle integrated into the hinge. The plastic inner bin has a metal carry handle and can be removed.

Once Hailo, always Hailo! With 80% willingness to repurchase, the products by this traditional brand can often be found in a home many times over, so Harmony fits perfectly into Hailo's design concept across all lines.

1/2

The Harmony series of waste bins was honoured for its high design quality at both the iF Design Award 2018 and the Red Dot Award: Product Design 2018. The coveted awards underline Hailo's high design expertise.
